Project views

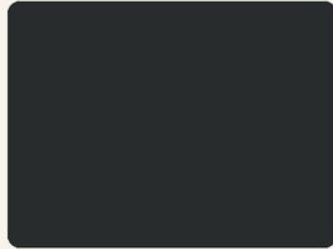

# Florida Modern Farmhouse

Color palette and design language

## WARM WHITE

Creates a bright Florida exterior and a calm interior background.

## CHARCOAL

Sharpens windows, roof lines, hardware, and architectural details.

## NATURAL OAK

Warms cabinetry, furniture, beams, and relaxed living spaces.

## LIMESTONE

Adds grounded texture at masonry, counters, tile, and hearth elements.

## LANDSCAPE GREEN

Links the home to palms, pines, grasses, and shaded outdoor rooms.

### THE DESIGN IDEA

## Florida light with a grounded modern edge.

Warm white keeps the broad farmhouse composition fresh rather than rustic.

Charcoal windows and roof accents give the elevations definition and a contemporary profile.

Oak and limestone bring natural depth to the kitchen, great room, and private retreat.

Muted landscape greens help the architecture settle comfortably into its Florida setting.

### PALETTE BALANCE

Warm white foundation | charcoal definition | oak and stone warmth
